

California OES Weather Threat Briefing

Wednesday, June 16, 2021
9:00 AM PDT

Day 1 (Wednesday): Very hot temperatures will continue across much of southern California today, with high heat risk impacts expected. Moderate to locally high heat risk impacts will also begin spreading into the Central Valley today.

National Weather Service

*Western Region Headquarters
Regional Operations Center
Salt Lake City, UT*

WEATHER KEY POINTS

06/16/21 - 06/22/21

Wednesday - Tuesday

- Other than isolated mountain showers, dry and increasingly hot weather is expected through the weekend
- A widespread and long-duration heat wave will impact much of the state through the week and into the weekend, with temperatures gaining several degrees each day, peaking Wednesday through Saturday. High temperatures will range from 100 to 110 degrees across the Central Valley by mid and late week, while inland areas of southern California range from 100 to 120 degrees, even hotter near Death Valley. **These temperatures will be dangerous for a large segment of the population!**
 - Extreme heat will significantly increase the potential for heat related illnesses, particularly for those working outdoors, participating in outdoor activities, and those who are heat sensitive
- Elevated to locally critical fire weather conditions can also be expected along and east of the the Sierra as well as the southern California mountains through next weekend as winds gust 25-40+ mph at times and very dry weather continues

CALIFORNIA WEATHER IMPACTS

06/16/21 - 06/22/21

<u>Hazards / Day</u>	WED	THU	FRI	SAT	SUN	MON	TUE

PRECIPITATION FORECAST

06/16/21 - 06/18/21

No significant precipitation is expected through Friday

Precipitation (inches)

HEAT RISK FORECAST

06/16/21 - 06/18/21

Wednesday

Thursday

Friday

Category	Level	Meaning	Category	Level	Meaning
Green	0	No Elevated Risk	Red	3	High Risk for much of the population, especially those who are heat sensitive and those without effective cooling and/or adequate hydration
Yellow	1	Low Risk for those extremely sensitive to heat, especially those without effective cooling and/or adequate hydration	Magenta	4	Very High Risk for entire population due to long duration heat, with little to no relief overnight
Orange	2	Moderate Risk for those who are sensitive to heat, especially those without effective cooling and/or adequate hydration			

WEATHER OUTLOOK

06/21/21 - 06/29/21

6-10 Day Outlook (June 21 – June 25)

Temperatures

- Above normal temperatures are favored to continue statewide

Precipitation

- Near normal precipitation is favored statewide

8-14 Day Outlook (June 23 – June 29)

Temperatures

- Above normal temperatures are favored statewide

Precipitation

- Near normal precipitation is favored across most of the state, with below normal precipitation favored for far northern California
